

PRESS RELEASE

Worldwood b.v. distributor of MARINEDECK 2000[®] for the Dutch yacht- and shipbuilding industry.

Back in the eighties of last century STAZO marine equipment b.v., with sales offices and warehouses in the USA and Australia, developed the natural substitute for yacht- and ships decks of teakwood: MARINEDECK 2000[®]. Already for many years this product represents a substantial part of the production program in the STAZO production facilities in Hendrik Ido Ambacht, about 10 km from Rotterdam (NL). MARINEDECK 2000[®] is the number one and worldwide exported substitute of yacht- and ships decks provided by nature.

Major investments in production equipment were recently made to manufacture MARINEDECK 2000[®] planks and sheet by automatic machinery. In addition to that, a system was engineered to manufacture prefabricated and finished yacht- and ships decks (including caulking material) the so called MARINEDECK 2000[®] PFD system.

In addition to the successful STAZO export strategy, STAZO has appointed Worldwood b.v. for the distribution of MARINEDECK 2000[®] to the Dutch yacht- and shipbuilding industry in the Netherlands as from February 15th. 2008. Worldwood b.v. is a highly appreciated logistic- and commercial partner on the Dutch marine market, being specialized in the marketing, trade and distribution of all types of natural wood for the marine industry. The addition of the durable and natural product MARINEDECK 2000[®] is a logical step forward for Worldwood b.v. The agreement enables STAZO marine equipment b.v., besides the company's export activities, to concentrate on production, product innovation, new products and on support and service, incl. the technical support to Worldwood b.v. on the Dutch market. The agreement of course does not effect the purchasing prices to the yacht- and shipbuilding industry. The 5 years guarantee period will remain unchanged too, provided the prescribed SIMSON primers, adhesives and deck caulk has been used for the installation. STAZO has hired a new sales person for the sales and support of the SIMSON marine line.

Specific information about MARINEDECK 2000[®] is provided by: www.stazo.nl
